VIVIID GREEN
Sustainability Made Simple

JOB SPECS

Position Title: Technical Head	**Location:** Mumbai, Maharashtra, India

Summary: We are seeking an experienced **Technical Head** to join our innovative team at **Viviid Emissions Reductions Universal Private Limited (VERUPL)**. The Technical Head will be responsible for overseeing the successful registration of our customer projects under various international standards and mechanisms, such as **UNFCCC**, **Verra**, **Gold Standard**, **IREC**, and others. The role will also involve leading advocacy efforts on policy matters.

The ideal candidate will possess a strong blend of technical expertise, strategic vision, and leadership abilities to drive our technological advancements and ensure that our projects generate high-quality carbon credits.

Roles & Responsibilities

- **Technical Leadership:** Provide leadership in the development and implementation of technology strategies that align with the company's vision and goals.
- **Project Registration:** Oversee the technical processes for the registration of our customer projects under international mechanisms such as UNFCCC, Verra, Gold Standard, IREC, etc.
- **Compliance with Standards:** Ensure compliance with relevant international standards and protocols, and maintain the highest levels of accuracy and quality.
- **Innovation:** Drive innovation in our processes and systems to improve efficiency and effectiveness in project registration and verification.
- **Team Management:** Lead and mentor a high-performing technical team, fostering a culture of continuous learning and improvement.
- **Policy Advocacy:** Advocate for policies that promote effective carbon offsetting mechanisms and support the company's mission.
- **Stakeholder Engagement:** Manage relationships with key stakeholders, including project developers, consultants, regulatory bodies, and policymakers, to facilitate smooth project registrations and industry progress.
- **Risk Management:** Identify and mitigate potential risks related to project registration and compliance.
- **Reporting:** Prepare detailed reports and presentations on project statuses, outcomes, and industry trends for executive leadership and external stakeholders.
- **Technology Integration:** Ensure seamless integration of new technologies and platforms to support project registration and monitoring.

Qualifications:

- ✓ **Education:** Bachelor's or Master's degree in Engineering, Environmental Science, Computer Science, or a related field. Advanced degree preferred.
- ✓ **Experience:** At least 12 to 15 years of experience in a senior technology leadership role, preferably within the environmental services or carbon markets sector.
- ✓ **Expertise:** Proven expertise in managing the registration of projects under international carbon market mechanisms (UNFCCC, Verra, Gold Standard, IREC, etc.).
- ✓ **Technical Skills:** Strong understanding of digital platforms, software development, database management, and data analysis.
- ✓ **Leadership:** Demonstrated leadership and team management skills, with the ability to convey complex technical information to non-technical stakeholders.
- ✓ **Problem-Solving:** Strong analytical and problem-solving skills, with a proactive approach to identifying and addressing issues.
- ✓ **Innovation:** A strong focus on innovation and continuous improvement, with a passion for driving positive environmental impact through technology.

Compensation: In line with Academics, Track Record, Experience, and Market Parity.
